

after their chat on the crowdfunding for androids the started drawing
ascende took some inspiration from the human skelett with some additions from
the animal world like fish gilles and bird wings
perma added the artificial flesh
with skin what had photosynthesis capabilities
as well colour changing like the chameleon

in their next chat ascende started wondering how psylocibin mushroom and
cannabis flowers would fit into this android formed after human animal plant
features

perma proposed to build the cannabis flowers into the head covering hair, beard
and eyelashes while the mushrooms could grow in the pits under the arms

to draw the outer forms was quite easy for them
perma used berries leaves and tree bark to draw either on paper or she just laid it
out on the ground to send it to ascende as a photo taken with her smartphone

ascende used photos from the internet what have been given for free reuse and
worked with several
filters and drawing on the computer and his smartphones as well as handheld
game devices with homebrew drawing programs on it

the second phase was more diffult and it took both of them some months untill they
were starting to learn about the inner visuals of flesh and cells

perma chose the meditating way to see before her inner eye how the different
microscopic pictures ascende sent her could be visualized into a collage

a photo of a human skin cell melange with plant photosyntesis hull cells and
magnifications of the
chameleons skin

when ascende saw this drawings from perma showing her design what possibly a
mix of several types osf skin cells could look like
ascende decided that he would try to do some biological petri dish experiments
using some own body cells and some plant tissue
while leaving out the chameleon as he did not want to disturb a wild living
chameleon
he was a vegan at this time and did not want any animal being captured, bred in
captivity or hunted...

he needed half a year to learn the techiques of biohacking ...
when he finally was successfull in creating a mix
between human cells and plant photosynthesis tissue
perma saw in his microscope photos some structures she had drawn

making her think of how possibly a wild living creature would want to contribute

living cells to build the biological life tissue for an android

where she lived in the tropics she could easily go to a place where chameleons were
there she meditated on her own drawings as well as on the photos ascende sent from his petridishes

and one chameleon came to sit in her lap rubbing his body at her clothes while she was staying still passivly
when the chameleon went away, she carefully took the skin cells what the chameleon left on her skirt
and bagged it to send it quickly to ascende

he was so happy to hear perma telling him how she was so nicely donated with the living tissue

he quickly studied in the internet how he could keep this chameleon skin cells alive and managed it in a special petridish

when perma heard this, she proposed to come to paris where ascende had his flat he had bought himself when he got donated 2 million €£\$
from an art conneisseur who thisway showed his appreciation for ascendes dance videos, novels and drawings he had produced during the last 15 years
the art sponsor did not buy any rights or something, he was just happy to have found ascendes collection
on an internet archive server
these days he was eagerly following the work of ascende and perma

ascende had built an online presence where he posted all their drawings and chat protokoll regarding the android crowdfunding project
with a forum where people could comment on each photo and videos of the living cell mixes or on the chat text or the phone audio files between ascende and perma

when perma arrived in paris and came to ascendes flat where he had installed all kinds of aeroponics and hydroponic plant growing some of his food
also cannabis plants were coming well within his flat
mushroom chambers and microalge bioreactors completed the rooms where the petri dishes of the
android skin cell growing project took place

as perma saw this, she said... this looks to me as if our android talents are being designed in nearly this setting where we wish them to build it inside the lifeships

ascende... basicly you are right on that while i have not yet counciously thought of the exact positions of what type of growing proces regarding to the other processes

perma... how about we install video cameras here so we can show the people what follow our project 24 hours what happens in the petri dishes bioreactors funghi rooms aeroponics

ascende ... this way the consciousness of the supporters too can help to direct attention and mental life force towards the processes we collectively wish to help give birth too

perma.. like i did with my meditation sitting at the place where chameleons live, the supporters can fill their computer screens, smartphones etc with a mix from live petri dish video feeds, our drawings ... and if they feel inspired to it, add their own sketches drawings both in a window javabox on their own screen... so they meditate design cocreate while part of their eye rests on the live petridishes

ascende... where we hope we will find a lasting life sustaining cycle engaging itself so we ideally can continuously work with the same cell tissue donated by the chameleons, me and some stuff i took from plants

perma... you took it in a gently way ?

ascende ... i tried, but i guess my relationship to plants in general is not as tender as it could be...

i managed to eat less food and chew each bite till it is fluid in my mouth... but i still eat perhaps double the amount what i think would be necessary at my stage of mental evolution

perma... perhaps we can learn here together, i too would like to intensify my gratitude to the plants what offer their life force to give me pleasure nurture and reconnection to the cosmic love

ascende... my flat is big enough , i am very happy with you staying as long you dont miss your permaculture hut in the tropics

perma... mmmhh ... i miss it already but i see with our project that we have here a strong chance to keep this chameleon donated cells alive , i think i would like to contribute my own body cells, eventually our bodies having met when i was at the chameleons living place to meditate... perhaps there is a chance of our souls helping us to carry the meeting energy from the tropics to paris

ascende.... brilliant, i like this ... and if the cell culture mix of yours with chameleon and mine with plant tissue... are both stable for a week or so ...

perma jumping in... we pack them in and bring them to my tropic hut where we set up shop, transmitting data to the net via satellite dish

so they researched learned from each other, the petri dishes, the supporters what were now quite a few, while some of them botanists microbiologists biohackers etc

some people asked when ascende and perma would start the crowdfunding

that was a difficult question... at what stage would it be wise to start the end phase with a time schedule till the androids could be delivered

basically, the crowdfunding for the production could start at that moment when all of the necessary biologic processes were researched and a prototype was functioning

or ... more possibly.. the actual growing of the prototype would perhaps need a separate crowdfunding, as the growing of bones and muscles connected to computer brains ... it all being complex as anything and needing eventually itself 5 billion €£\$...

this then a research crowdfunding ... aiming at the 500 million people ascended and perhaps guessed could afford to pledge 4600 €£\$ within one year for a working android talent friend these 500 million people could donate 10 €£\$ to get the 5 billion together eventually needed to complete the research within 5 years
